

**Date:** March 17, 2016

**Attention Investigators:**

Meghan Tandon, a security engineer at Flip Security Inc. has been murdered. You may recognize the name of Flip Security from the open investigation involving the alleged OSIRIS Award Show hack. Meghan, a former member of Synonymous, had been leading the investigation. Flip Security Inc. has been a known target of Synonymous in the past.

Your impeccable investigative skills are needed. Since Meghan's death, CSAW Investigative Services has taken on the case. In light of implications with the OSIRIS Awards, CSAW IS requires the best forensic examiners (that's where you come in) to solve the murder, identify the perpetrators and their methods, and verify the integrity of the OSIRIS Awards data in order for the OSIRIS Awards to take place. The award show must go on!

Attached to this is the police profile that was filled out after the death of Meghan Tandon. It is up to you and your team to figure out who killed her.

**Instructions:**

Register your team on: [mcpshsf.com](http://mcpshsf.com) and keep a report of all evidence you come across during the investigation in the shared Google Doc that has been sent out to your team. As you come across flags during the competition, enter them into the site. If you find two pieces of evidence are connected somehow, create a connection between them. If you find a piece of evidence that you believe is important, and you do not have a flag for it, enter in the name of the evidence into the site anyways. To get you started, here is your first flag: **{and\_so\_1t\_begins}**.

## Helpful Information

You will have to setup an Android Virtual Device (AVD) and it can be very annoying to do so. There is help online to get you started (if you don't know how to do so already), but if you continue to have problems please ask for help from a Judge, we do not intend for you to become stuck on this part of the evidence.

Here are some links to get you started:

- Java JDK (You will need this for Android Studio):  
<http://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html>
- Android Studio (You will need this for the Android SDK):  
<https://developer.android.com/sdk/index.html>
- How to access the AVD interface:  
<https://developer.android.com/tools/devices/managing-avds.html>
- Helpful information (may be out of date) for changing the AVD to work for your computer: <https://blahti.wordpress.com/2011/08/24/how-to-export-and-import-android-virtual-device-avd-files/>
